

*Adelopetalum exiguum* (was *Bulbophyllum*)

# Bomaderry Creek Walk Oct. 2019

Thanks to Alan Stephenson and the other happy walkers we had a great day!  
Some of the wonderful things we saw.

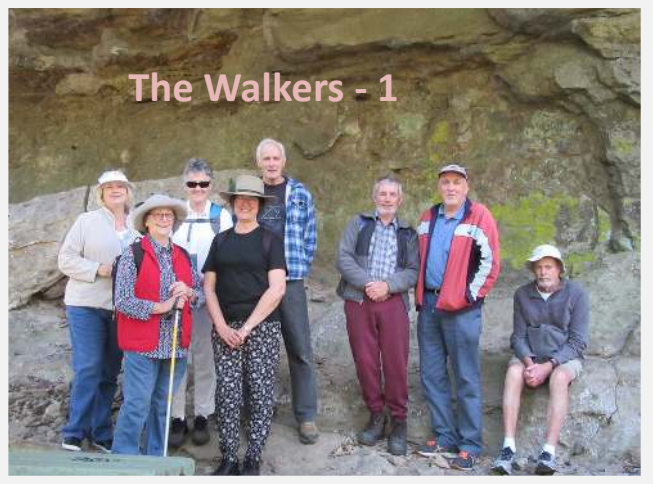

A beautiful blue sky day and a bonus to spot *Den. speciosum* in flower.

*Dockrillia linguiformis*

The Walkers - 1

Lots of *Dockrillia striolata*

A couple of ladders but luckily the only snakes we saw were the Pascalls variety.

Very happy to see this little chap every now and then as sometimes the 'track' was difficult to make out as we scrambled among the rocks and boulders!

*Plectorrhiza tridentata*

Fancy camping out, anyone?
